## PROFESSIONAL SUMMARY

Senior Frontend Developer with 7 years of professional experience in software development, including 5 years specializing in modern web technologies such as **React.js**, **Next.js**, and **TypeScript**. I have a consistent history of building reliable, fast web applications and managing the technical planning for international clients. Running my own development practice has taught me how to look at projects from a business perspective, ensuring I deliver solutions that actually solve user problems from day one. I am known for writing clean, maintainable code and focusing on high quality UI/UX and performance. Currently seeking a senior level position to apply my experience in technical leadership and frontend architecture within a collaborative team.

## TECHNICAL SKILLS

### Core Engineering:

JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS.

### Performance & Quality:

Web Performance Optimization, Core Web Vitals, Bundle Optimization, Debugging, Cross-Browser Compatibility.

### Frameworks & State:

React.js, Next.js, Redux, Redux Toolkit, Context API, React Router.

### Tools & Ecosystem:

Git, GitHub, Jira (Agile/Scrum), Figma, VS Code, Firebase.

### UI Architecture:

TailwindCSS, Material UI (MUI), Chakra UI, ShadCn, Bootstrap, Responsive Design.

### API & Backend:

RESTful API Design, GraphQL, AJAX, JSON, Authentication Flows (JWT/OAuth).

## WORK EXPERIENCE

### SENIOR FRONTEND DEVELOPER (Self-Employed)

Independent Software Practice | Gujrat, Pakistan (Remote)

June 2018 - Present

- Architected and delivered 10+ diverse web applications for international clients, ensuring every project met strict business requirements and modern performance standards.
- Boosted application performance by 30% by implementing advanced code-splitting and performance profiling, resulting in improved user retention and SEO for client platforms.
- Standardized frontend workflows by building modular component libraries and centralized state management systems, reducing feature development time by approximately 15%.
- Led and mentored a cross-functional distributed team of developers and QA engineers, taking full ownership of technical roadmaps, code quality reviews, and project delivery milestones.
- Collaborated directly with stakeholders and UI/UX designers to define technical feasibility and convert complex business logic into user-friendly, production-ready interfaces.
- Directed the full project lifecycle for high-scale B2B and e-commerce platforms, moving from initial discovery phases to successful deployment.

### FRONTEND DEVELOPER (Contract)

Komorebi Technologies & GulzarSoft | Gujrat & Rawalpindi, Pakistan

Oct 2020 - May 2021

- Developed responsive web applications and modular components using PHP and React.js, ensuring high performance across various browser environments.
- Redesigned core UI modules for high-traffic platforms, which increased user engagement by approximately 20% by identifying and resolving navigation friction points.
- Contributed to the full Software Development Life Cycle (SDLC) by participating in sprint planning and defining technical requirements alongside senior architects.

## PROJECTS

### Product Genius (Shopify AI SaaS) | React, Typescript, Polaris, FastAPI

Architecting the frontend and UI/UX evolution of a merchant-facing management app. Focused on transforming complex AI data into intuitive dashboards and developing a mobile-first interface that improved merchant accessibility across various devices.

### Premium Property Management (PPM) | React, Next.js, TailwindCSS, Bootstrap, RBAC, Django

Directed the frontend engineering and team synchronization for an enterprise ERP. Personally developed 90% of the platform architecture and managed the full development lifecycle, delivering a secure, multi-tenant system for high-scale real estate operations.

### Frame Fitness (Luxury E-Commerce) | React, TypeScript, GraphQL, Stripe, Django

Delivered the initial frontend architecture for a premium hardware brand, focusing on a high-conversion checkout journey. Successfully translated complex Figma specifications into a pixel-perfect, responsive interface that maintained 100% brand integrity during the launch phase.

### Daraz Label Generator | Electron.js, React

Engineered a custom desktop automation tool to optimize fragmented logistics workflows. Developed a PDF processing engine that restructures shipping labels into efficient layouts, resulting in a 60% reduction in manual processing time and printing costs.

### Employee Management & Payroll Suite | React, Typescript, Firebase

Architected a full-stack operations platform to automate distributed team management. Engineered a custom financial logic engine for variable payroll and automated reporting, reducing manual administrative overhead by 50% while ensuring total financial accuracy.

## EDUCATION

### Bachelor of Science: Computer Science

University of Gujrat | Gujrat, Pakistan

Graduated 2020

- Final Year Project:** Developed an AI-based Emotion Recognition system using Electron.js and a Python backend. Personally designed the UI using HTML, CSS, and jQuery, while coordinating the integration of frontend components with complex backend analysis scripts to ensure seamless data visualization.
